## PROFILE

Web Developer who is building accessible and responsive web applications primarily using front-end technologies. Backed by a background in operations management, I leverage my extensive experience in leading complex tasks and problem-solving to develop performant web interfaces.

## PROJECTS

- **Tour Agency Inventory** | React, Firebase database. This app helps to manipulate tour data by adding, removing and editing an inventory in the table, updated information renders in real-time on the user's page. | [Code](#) | [Live](#)
- **Recipe Generator** | JavaScript, API, jQuery. This app accesses recipe API data to provide recipe suggestions based on the user's input of ingredients selection. | [Code](#) | [Live](#)
- **Country Quiz** | JavaScript, SCSS. This app is a multiple-choice fun quiz and analyzes the data inputted by the user, based on answers about the countries specifics, interests and character | [Code](#) | [Live](#)
